SUMMARY

"Motivated software engineering graduate with a strong foundation in modern web technologies including React.js, Next.js, TypeScript, .NET, and Spring Boot. Experienced in designing and delivering scalable, user-centric applications, with hands-on exposure to full-stack development and enterprise system workflows. Combines a solid understanding of software engineering principles and agile methodologies with practical experience coordinating development efforts and translating business requirements into effective technical solutions. Passionate about building impactful software and committed to continuous learning and engineering excellence, with a clear focus on contributing as an Associate Software Engineer."

WORK EXPERIENCE

Software Project Manager

Bevolv (Pvt) Ltd.

January 2025 – July 2025 | Colombo 05

- Led end-to-end delivery of enhancements for national e-governance platforms (eBMD and Online Land), coordinating engineering execution across a 12-member cross-functional technical team.
- Translated product requirements into actionable engineering tasks, improving sprint clarity, execution flow, and delivery consistency.
- Introduced and refined agile engineering workflows (backlog structuring, sprint planning, definition of done), improving team throughput and release predictability.
- Coordinated development of a Trade Management Platform (8 engineers), supporting modular feature delivery across document workflows, indenting, and buyer–seller coordination systems.
- Worked closely with Upper-Management and PMO on technical scoping, effort estimation models, and feasibility analysis for software proposals and system enhancements.
- Contributed to solution-level discussions with engineering and business teams for architecture alignment and implementation planning.
- Supported stakeholder communication for 10+ clients, ensuring clear translation of technical progress, risks, and system constraints.

Associate Project Manager

Inova IT Systems (Pvt) Ltd. | Bevolv (Pvt) Ltd.

November 2022 – Jan 2025 | Colombo 05

- Coordinated with multiple divisions on engineering execution across enterprise and e-governance systems, ensuring alignment between development, QA, and deployment pipelines.
- Assisted in sprint planning, requirement breakdown, backlog grooming and production release for engineering teams.
- Monitored system delivery pipelines and release readiness, supporting consistent production deployments.
- Contributed to PMO technical reporting, including delivery metrics, risk tracking, and implementation status dashboards.

EDUCATION

MSc in Computer Science (Reading)

University of Colombo

2025 – present | Colombo 07

BSc in Information Systems

University of Colombo

2020 – 2023 | Colombo 07

GCE A/Ls in Physical Science Stream

Royal College Colombo

2015 – 2018 | Colombo 07

EXPERTISE

Frontend

JavaScript | React.js | Next.js | TypeScript | Tailwind CSS | Bootstrap | Redux

Backend

Spring Boot | .NET | Python | Java

Database & Other

MySQL | MongoDB | Git & GitHub

PROJECTS

Personal Portfolio Website

Self Learning / Promotional Project | Repo

Tech Stack: React, JavaScript, Vite, Tailwind CSS

2025-Present

- Designed and developed a responsive personal portfolio website to establish a strong digital presence and effectively showcase my personal achievements as an active job seeker.
- It serves as a centralized project hub, presenting multiple development projects, including web applications and desktop-based applications, demonstrating hands-on expertise in software development, problem-solving, and UX design.

Pharmacy & Medicare Management System

Self Learning Project | Repo

Tech Stack: React, JavaScript, Spring Boot, MySQL, Hibernate

2025-Present

- Designed and developed a web-based Pharmacy Management System to digitize and streamline the core operations of a retail pharmacy, improving efficiency in inventory control, sales tracking, and customer management.
- The system enables centralized management of pharmaceutical products, including stock monitoring, expiration tracking, and automated updates based on specific user roles and their respective permissions to ensure accurate inventory levels.

Job Application Tracker

Self Learning Project | Repo

Tech Stack: Next.js, TypeScript, Tailwind CSS, MongoDB

2026

- Developed a web-based Job Application Tracker to streamline and optimize the job search process by enabling users to efficiently manage and monitor multiple applications in one centralized platform.
- The system allows users to record and track job applications across different stages—such as applied, interview, and job offer etc. while maintaining detailed information including company data, application status, and personal notes.

Game Listing Web Application

Self Learning Project | Repo

Tech Stack: React, JavaScript, Vite, CSS, RAWG API

2025

- Developed a browser-based dynamic game discovery web platform to provide users with instant access to a curated collection of computer games through a centralized and user-friendly interface.
- It integrates with the RAWG API to display trending titles, search results, and game details, while it utilizes React Context API for centralized state management across components, ensuring a smooth and responsive user interface.

STRENGTHS

Problem Solving | Critical Thinking | System Design Thinking | Agile Methodologies | Team Collaboration | Time Management & Prioritization | Attention to Detail | Adaptability
